The big Fastrac difference

The big Fastrac difference

**SPEED**

The fastest production tractor in the world

# The big Fastrac difference

- Unique suspension gives superior handling and stability enabling 43mph (70kph) road speeds.
- External disc brakes and twin calipers provide unrivalled stopping power.

## SPEED

- GPS capability makes for high accuracy spraying and spreading up to 25mph (40kph).
- Rapid Steer option reduces lock to lock turn by 50% for faster headland turns.

The big Fastrac difference

**COMFORT**

The only tractor with all-round suspension

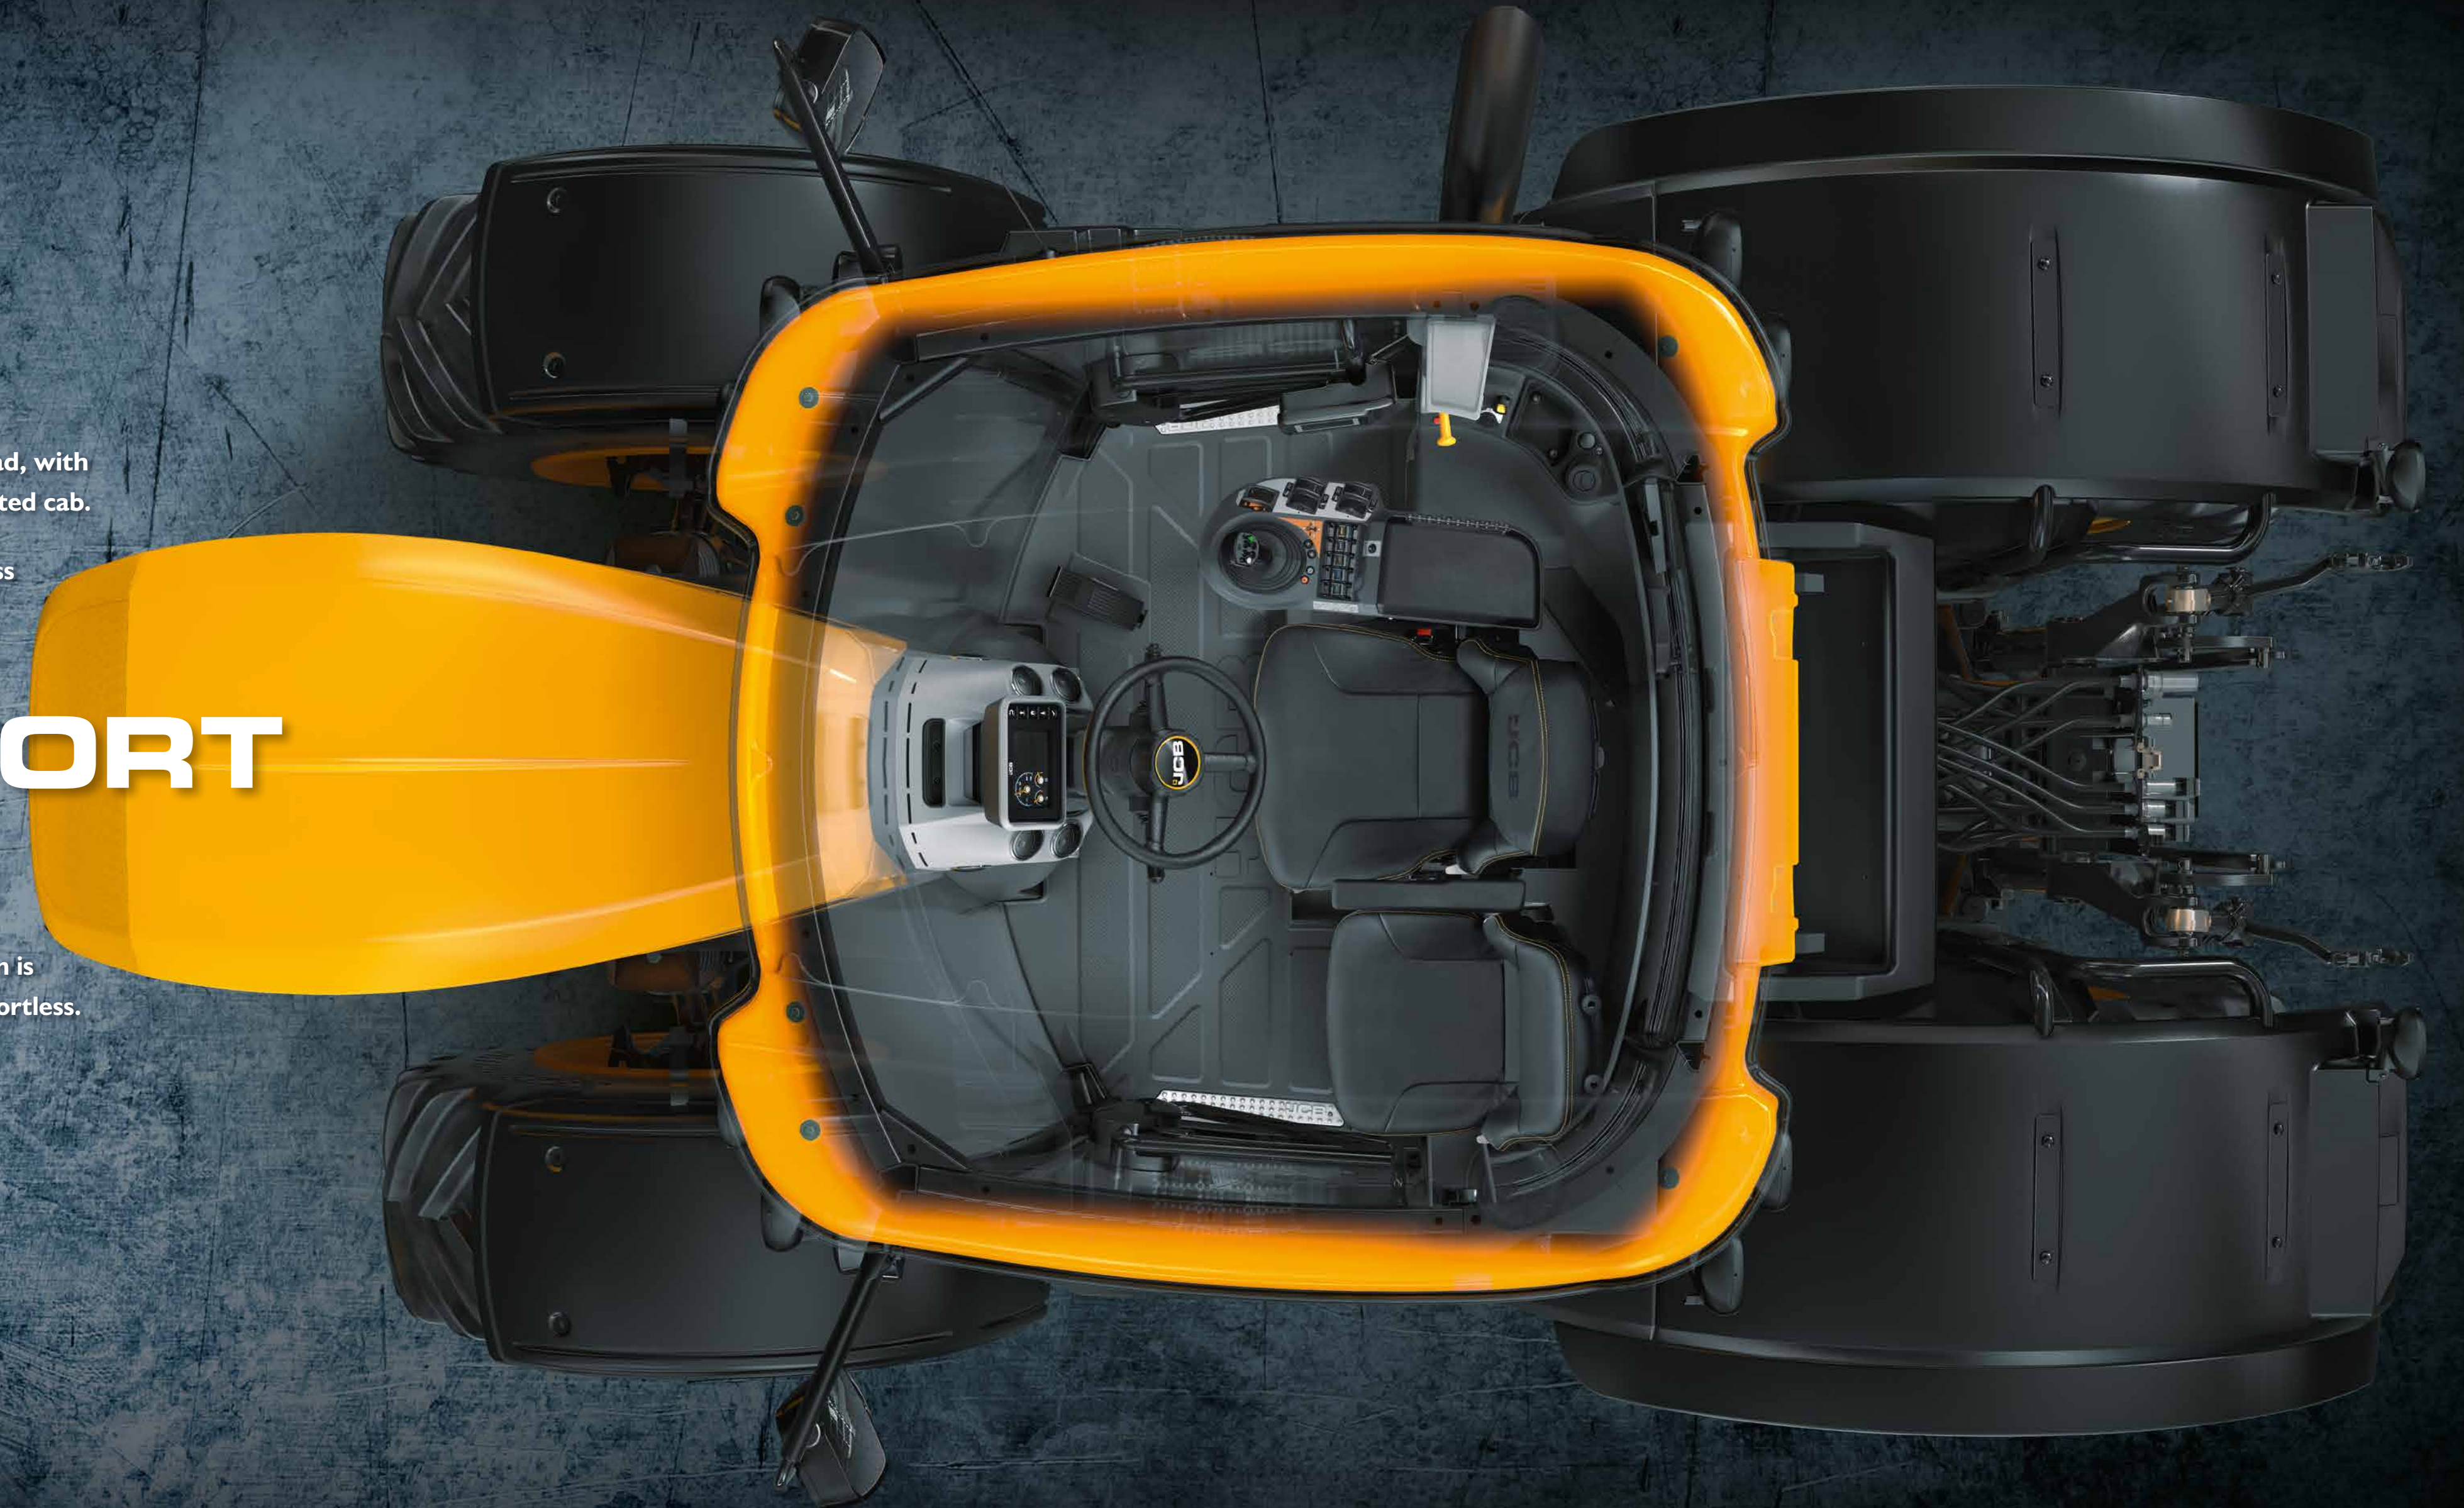

# The big Fastrac difference

- Work in total comfort, field or road, with all-round suspension and mid-mounted cab.
- Command Plus cab with best-in-class comfort, visibility and ergonomics is the largest on the market.

## COMFORT

- Unrivalled 70 degree seat rotation significantly reduces driver fatigue.
- The hydrostatic dual steering system is highly responsive making driving effortless.

The big Fastrac difference

**PRODUCTIVITY**

The most productive all-round tractor

# The big Fastrac difference

- Faster road and in-field speeds, in certain applications, enable you to get more done in a day.
- Unique all-round suspension means operators can work quicker and longer on uneven fields.

## PRODUCTIVITY

- Unrivalled 50:50 weight distribution and Activ Traction, perfect for heavy draft applications.
- The best engine and CVT transmission combine to deliver the ultimate in power and torque.

The big Fastrac difference

**SAFETY**

More safety features than any other tractor

# The big Fastrac difference

- Exclusive hydrostatic dual steering system meets the stringent safety standards required for high speed travel.
- Truck standard air braking and ABS provide exceptional tractor and trailer stopping power.

## SAFETY

- Unique four-wheel disc brakes stop a Fastrac consistently quicker than any conventional tractor.
- Largest volume of glass provides superior all-round visibility.

The big Fastrac difference

**VERSATILITY**

The most versatile tractor in its class

# The big Fastrac difference

- From hauling at 43mph (70kph) to heavy draft work at 4mph (7kph), no tractor is more versatile.
- Purpose-designed chassis gives more implement mounting versatility than any other tractor in its class.

## VERSATILITY

- Powerful rear hitch combined with optimum linkage geometry lifts a genuine 10,000kg with ease.
- Wherever you are in the world, whatever your application, the Fastrac delivers the ultimate in versatility.

## Discover the difference

Some of our products are really quite different. The JCB Fastrac holds a very special place in my heart. It is a very special product.

Twenty five years have passed since the launch of the first JCB Fastrac and there is still nothing quite like it in the market place today.

The JCB Fastrac is different. It is unique. It is real innovation.
